

Unit 16 — Medication

aerosol

a form of how medication is administered, where it is sprayed and can be inhaled

"The asthma medication was administered by aerosol."

analgesic

a drug such as aspirin, used as a pain killer

"When the patient complained of pain, the nurse gave him paracetamol as an oral analgesic."

antacid

a drug used to treat heartburn or indigestion

"Many people take antacid to soothe their stomachs after eating spicy or fatty food."
