

## Unit 17 — Miscellaneous

2025 Medical English Online Course. All rights reserved.

### Arterioles

a branch of an artery leading into a capillary

"Arterioles constrict and dilate to regulate blood flow."

### Inhalant

a medicinal preparation given through the nose or mouth

"In case of an unexpected asthma attack, he always carries an inhalant in his backpack."

### Larynx

the "voice box", the part of the throat containing the vocal cords, used for breathing, swallowing, and talking

"The larynx is responsible for manipulating pitch and volume."
