Biopsy

a test in which a tissue sample is removed and examined for the presence of a disease

"To rule out the possibility of cancer, a biopsy must be performed."

Blood culture

a test performed to detect if microorganisms such as bacteria and fungi are present in the circulatory system

"Results from a blood culture can identify the type of microorganisms responsible for the infection."

Check-up

an examination performed by a doctor to make sure a patient is healthy

"Everyone should have regular check-ups at a GPs' surgery."
